[REDACTED] presented a detailed breakdown of the [REDACTED] internal structure and its relation to [REDACTED] emphasized the fact that [REDACTED] functioned independent from [REDACTED] but was controlled by an eleven man board of directors. Five [REDACTED] men were on the board and six [REDACTED] men; however, [REDACTED] could only name two of the [REDACTED] men on the board.

The afternoon of 3 February was spent touring [REDACTED] facilities and discussing [REDACTED] capabilities in the fields of optics and electronics.

The morning of 4 February 1966 was spent discussing the [REDACTED] proposal. It was decided that [REDACTED] should submit a revised work statement with three optional tasks which would be considered but not necessarily included in the program.

The main portion of the work statement was to present the Modulated Light Evaluator task as the prime consideration. Image Panel Technology, Electronic Image-Data Processing, and Optical Data Processing were to be presented as the optional tasks.

[REDACTED] invited [REDACTED] to the 4 February meeting to discuss their contribution to the proposal. After several hours of discussion, [REDACTED] was convinced that [REDACTED] had nothing new to add to the Modulated Light Imagery Program.

The portions of the [REDACTED] proposal that were regarded as non-essential effectively removed [REDACTED] from the program.
